

ProsecutorProfessional™ Hot Check Management Solution

The Challenge

As a Prosecutor, you need an automated system to track worthless checks and bad debt cases to a successful conclusion. You require a software management solution that puts you on the offensive when it comes to handling bad check cases. Local merchants look to you for quick and accurate resolution to this ever-increasing problem.

The Solution

With ProsecutorProfessional™, the LGS Hot and Worthless Check Tracking management solution, Prosecutors can see the full cycle of current and closed check cases. Beyond the inbound/outbound accounting for checks, the system can print checks, track repeat offenders, issue notice letters, reconcile accounts and batch receipt payments.

Additionally, the system creates automatic reminders (ticklers), so a past-due payment never escapes your notice. When key dates are missed, the LGS system automatically prints reminders to initiate proceedings against the offending party and, at the touch of a button, prints case history confirmations. With our innovative one-time data entry technology, hot check information is readily available throughout all LGS modules. If your initial efforts to collect on a bad check have been unsuccessful and a formal criminal case is warranted, the Hot Checks system can automatically transfer all the information directly into the Criminal Case Management module of ProsecutorProfessional™.

*Integrated Case

ProsecutorProfessional™ Case Management Solutions

The Challenge

As a Prosecutor, you face increased caseloads, more complex cases, mountains of paper and growing costs, all with limited resources and tighter budgets.

The Solution

With ProsecutorProfessional™, the LGS integrated case management system, you get software built specifically for prosecutors with the input of prosecutors like yourself. Important details such as streamlined data entry, reduced paper generation and important enabling functionality like Victim and Witness data management have been carefully designed to meet strict requirements in a cost-effective browser-based solution.

At LGS, we understand your job as a prosecutor cannot be displaced by computer software; however, we have developed efficient, easy-to-use tools that provide comprehensive case management. LGS has been serving Prosecutors, Clerks and Courts for over 20 years, with hundreds of years of combined experience building software for local governments.
